About

I am a fast learner, junior iOS developer, designer, and student at Apple Developer Academy.

I don't have relevant experience in commercial development yet, but I've been studying mobile development, dealing with machine learning, and working on my pet projects for the last year. Also, as an ex-founder of a design agency, I had experience in entrepreneurship, management, and business.

I am looking at positions related to mobile development and product management.

Skills

- Swift
- CoreData
- CoreML
- SceneKit
- Python
- PyTorch
- OpenCV
- TensorFlow
- Figma
- Sketch
